

January 2012

To Whom It May Concern:

Deciding to have a whole new roofing system put on a 41,000 SF building is a substantial decision to make. Finding and choosing a qualified, professional company to do the job is essential.

With Remtek, we got that, and more. Remtek was on time, everyday, and completed the job in a timely fashion. Remtek took every step to ensure the safety of both their workers and ours. Additionally, they made sure to take precautions to protect vehicles and belongings in the parking lot all while being sure their own operations of work did not, in any way, interrupt ours. The scope of the work proposed was faithfully and completely fulfilled.

It is with much satisfaction, that we recommend Remtek.

Sincerely,

Bill Karl
